

POSITION DESCRIPTION CLINICAL PSYCHOLOGIST (ADULT and/or PEDIATRIC)

Storrie, Velikonja and Associates provides assessment, treatment, and rehabilitation services that are client-centred, evidence-based, and outcome-oriented in our full-service practice and three multidisciplinary specialty clinics located in Burlington. We are currently looking for Clinical Psychologists who practice in pediatrics and adults.

Our growing practice requires a Clinical Psychologist.

The Psychologist will be responsible for:

- Clinical interviewing
- Interpretation of psychometric tests
- Provision of diagnosis and feedback
- Provision of treatment recommendations and treatment planning
- Provision of treatment using a range of modalities (i.e., interpersonal, CBT, DBT, ACT, etc)
- Documentation (i.e., clinical record)
- Monitoring treatment efficacy and the provision of timely updates
- Maintenance of accurate caseload statistics
- Participation in quality management and practice evaluation activities.

SVA offers:

- Extended health benefits
- Fully staffed administrative support, including full-time reception, intake coordinators, and billing/accounting clerks, as well as psychometrists and file reviewers
- Ongoing professional development opportunities, including staff educational sessions and journal clubs
- Opportunity for multidisciplinary work and consultation with community rehabilitation and health care providers
- Opportunity to work in a large yet highly collegial and collaborative private practice setting with numerous clinicians of various backgrounds and expertise, allowing for informative consultation whenever needed
- Access to the newest technologies, including electronic test protocols, online scheduling, and electronic charting programs that reduce administrative demands
- Competitive hourly wages for both assessment and treatment services
- Opportunity to assess and treat clients from varied populations and referral sources including, but not limited to WSIB, MVA insurance, extended health benefits, Best Doctors (a telehealth-based mental health service), telepsychological services for rural clients, and self-pay patients with various diagnoses and presenting problems.

Minimum Qualifications:

- Ph.D. or M.A. in Psychology from an accredited university
- Current certificate of registration with the College of Psychologists of Ontario, or under/eligible for supervised practice
- Experience in neuropsychological assessment and treatment of adults and/or children in accordance with current evidence-based best practices
- Demonstrated adherence to professional practice standards
- Commitment to continuing education
- Excellent organization and time management skills
- Excellent verbal and written communication skills
- Ability to work both independently and as a team player
- Demonstrated satisfactory work performance.
