---

West End Psychological Services is currently looking to hire 1 or 2 part-time Clinical Psychologists or Psychological Associates who are licensed with the College of Psychologists of Ontario. Doctoral level psychologists ready for supervised practice are also welcome to apply.

Our clinic is well-established and located in the West end of Toronto (near High Park). We provide assessment and treatment services to adults, couples and adolescents. We are a dynamic and experienced team with a broad focus that includes specialization in work with marginalized populations and populations with complex presentations. As such, we offer a supervision model, peer consultation, additional training opportunities and extensive clinical support. Our work environment is diverse, positive, supportive and collaborative.

Our team is made of fully qualified professional Psychologists and Social Workers who have extensive experience in CBT as well as DBT, ACT and EFT. Our aim is to provide both excellent care to the community in which we work as well as specialized expertise in areas such as LGBTQ-informed care and evidence-based support for specific conditions such as Borderline Personality Disorder, psychosis, PTSD and concurrent disorders. We provide weekly supervision and support for those completing their licensure requirements as well as weekly team meetings for all clinicians to discuss clinical issues.

We run a comprehensive DBT program and would welcome an applicant to join our DBT team! Previous experience or training in DBT would be a great asset as well as a passion for working with individuals with pervasive emotional dysregulation. Supervision and additional/ongoing training in DBT would be offered.

We would also welcome applicants with couples training experience. Supervision in EFT for couples can be provided.

Lastly, we would also welcome applicants with Cognitive Behavioural Therapy training or Acceptance and Commitment Therapy Training.

Experience performing psychodiagnostic, psychoeducational and psychovocational assessments would also be a great asset to assist with our assessment service.

Availability to work evenings and/or Saturdays is an asset, otherwise hours are flexible and our rate of pay is competitive.

Please summarize relevant experience in a cover letter and provide a CV detailing your training, clinical experience, and other relevant qualifications. Please forward inquiries and application materials to:

Dr. Michelle Carroll, C.Psych
